[p.14] 'The Scottish Presbyterian Church, the English Anglican Church, the Lutheran Church and the Catholic Church—indeed, all Christian churches, their clergies, and their followers—believed that the earth was not even 6,000 years old.

—Repcheck, J., *The Man Who Found Time*, Perseus Publishing, 2003.

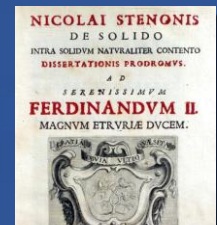

This belief was a tenet based on rigorous analysis of the Bible and other holy scriptures. It was not just the devout who embraced this belief; most men of science agreed that the earth was young.

—Repcheck, J., *The Man Who Found Time*, Perseus Publishing, 2003.

But they deliberately forget that long ago ... by these waters also the world of that time was deluged and destroyed.

Deliberately forget!

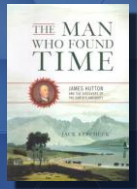

“The past history of our globe must be explained by what can be seen to be happening now.”

—James Hutton (1726–97) *Theory of the Earth*, quoted in A.Holmes, *Principles of Physical Geology*.

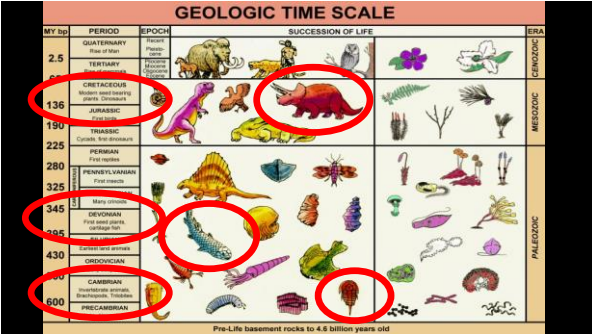

“[Jacket] ‘Hutton imagined that the earth was likely millions of years old rather than the biblically determined six thousand, ...”

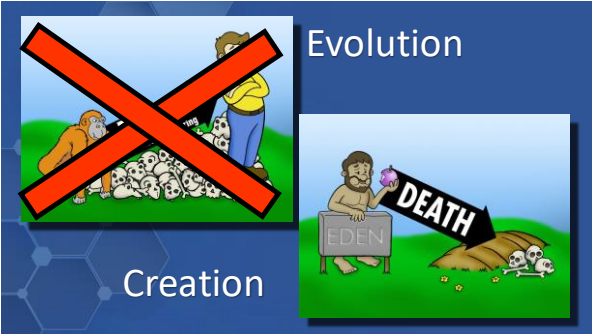

—Repcheck, J., *The Man Who Found Time*, Perseus Publishing, 2003.

[p.4] “Hutton’s theory was deeply upsetting on two counts. First it questioned the veracity of the Bible, and second, it displaced humans from close to the start of time.”

—Repcheck, J., *The Man Who Found Time*, Perseus Publishing, 2003.

Battled doubt

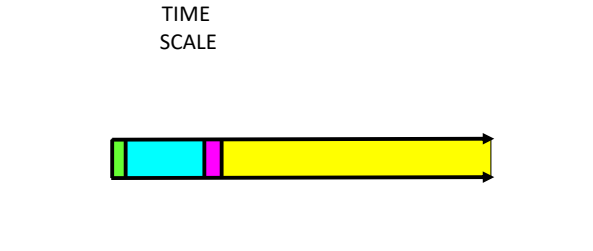

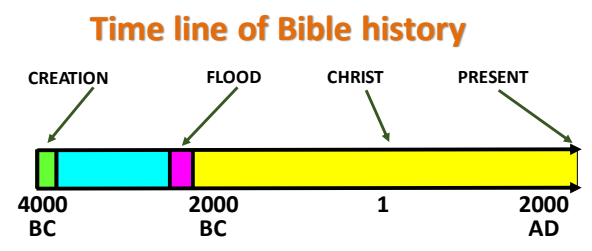

"I have battled doubt in my faith life for a long time, and most of it comes from evolution and dinosaurs and scientific stuff. I have found your website most useful ..."

"Number one sticking point"

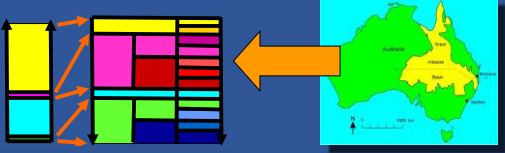

"I was raised in the church until my teens, before rejecting it and declaring myself an atheist/agnostic... the creation/evolution issue was the number one sticking point for me—how could I possibly believe the Bible if it was wrong from the very start? ..."

Sediments of the Great Artesian Basin

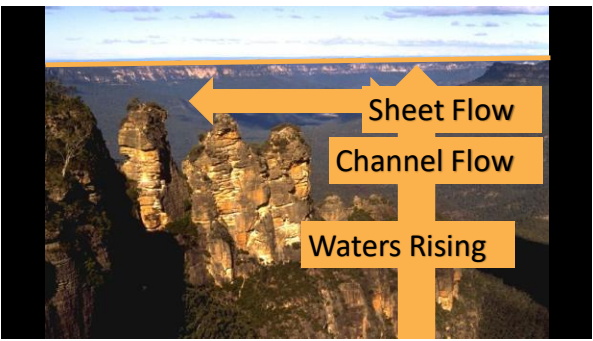

Large scale: Points to Creation or Flood
Contains fossils: NOT Creation event.
Must be Flood
Contains footprints: NOT Recessive stage.
Must be Inundatory stage
